Associate/Senior Biologist; Menlo Park, CA. TRA Environmental Sciences seeks to hire a mid-to senior level Biologist to join the staff at our Menlo Park, CA office.

TRA is seeking a biologist who is able to complete biological site assessments and impact analysis for CEQA/NEPA documents and state and federal permits. Must have a working knowledge of California flora and fauna, be able to map vegetation communities, know the pertinent laws/regulations, and be able to identify sensitive habitat types.

Additional desirable experience includes GIS mapping/analysis, wetland delineation, conservation planning, endangered species survey/handling, project and client management, and proposal preparation.

Minimum requirements are a Master’s degree in biology, ecology, natural resources or related field, or a Bachelor’s degree in such a field with 3-5 years relevant experience. Excellent organizational, written, verbal, and interpersonal communication skills are required. This position requires an independent worker who also enjoys working in a team environment.

TRA Environmental Sciences, Inc. is a small, established environmental consulting firm that specializes in the preparation of quality environmental documents for numerous local and state government municipalities as well as private land owners. TRA offers medical benefits and a profit sharing plan. Pay dependent on experience. TRA is an equal opportunity employer.

Qualified applicants please send a cover letter and resume to: Barbara Beard, Personnel Manager at HR@traenviro.com.
