Habitat restoration projects:

We are currently seeking qualified students to fill a wildlife biology position this summer. Southern California Edison owns and manages approximately 20,000 acres of mixed conifer forest in the Shaver Lake area. The successful applicant will be assisting the staff wildlife biologist in conducting raptor surveys and habitat restoration projects. Other duties may include application of prescribed fire, forest inventory, and reforestation. The position will be 40 hrs/week and pay will be $14-$16 hourly, depending upon experience. Employee housing is available for $100/month. Interested parties should send a resume and cover letter to our wildlife biologist Steve Byrd (Stephen.Byrd@sce.com) or give him a call at 559.841.3194.

Thank you for your assistance!
