Aloha! The Hawaii Island Hawksbill Turtle Recovery Project is currently recruiting volunteers and interns for the upcoming turtle nesting season. We are seeking volunteers for a 10+ week commitment between mid May and mid December. This program is a great way to get hands-on field experience working with nesting hawksbill turtles and hatchlings. In addition, participants get tons of outdoor field experience and small group skills.

We are specifically looking for people interested in the fields of biology, ecology, wildlife, natural resources, environmental studies, marine biology, outdoor education, etc. However, a science background is not necessary.

If you have any questions or can direct us in ways to reach more students, please don’t hesitate to contact us at (808) 985-6090, fax (808) 985-6029 or email at HAVO_Turtle_Project @ nps.gov

Thank you for your time and assistance. We look forward to working with students from your school.

Cheers,

William Seitz and Lauren Kurpita
Coordinators
