August 3, 2015

ANNOUNCEMENT

Internship Available for Eureka Historic Website

The City of Eureka Community Development Department will have internships available for the fall 2015 semester for students majoring in history, computer science, environmental planning, geography, GIS, and related fields. Selected applicants will intern for 3-4 hours per week beginning as early as September, 2015.

Interns will assist with gathering field information on historic properties in the City of Eureka, and contribute content to the City’s newly developed Historic Website. This is a great opportunity for students to research and learn about historic time periods and architecture of the City, while gaining experience utilizing a relatively new technology for historic preservation.

Interns will report to City Hall for work assignment and will visit surrounding Eureka neighborhoods to collect field data. Research work is also available at the HSU library.

Qualified individuals will have a basic knowledge and interest in regional history; be organized and provide attention to detail; and have a keen interest in historic preservation. Selected interns will receive training, work experience, and coursework credit.

To apply or for more information, contact Robert Jensen at rjensen@ci.eureka.ca.gov
