

## Clickers :: Training

Clicker training sessions are available at the beginning of each semester (Spring and Fall) during the week prior to school starting, or on demand. Sessions are also available throughout the year for both new users and returning users looking for a refresher. Instructional sessions, when combined, total 90 minutes and cover software installation, database and presentation creation, class information reviews, and uploading files. They can be broken into multiple shorter sessions to fit your schedule. We also do both individual and group sessions for whole departments.

Basic questions can often be answered by calling the [Moodle](#) [1] office at extension 3633, or by visiting us in person in Lib 315 during normal business hours. If you wish to organize a group Clicker training session, please let us know. Drop-in sessions for individuals are also available. Videos and Quick Guides can be downloaded from [this site](#) [2] and the Faculty Guide to Moodle.
