

## Network Folders

HSU offers central file storage for all current students, staff and faculty that's accessible over the web from on or off campus. If you often use computers from multiple locations (such as computer labs and offices), your HSU Network Folder is a great way to be able to access your files at any time.

For more information about Network Folders, see our Frequently Asked Questions for [accessing network folders](#) [1], [account and quota details](#) [2], and [faculty shared folders](#). [3]
