

Google Apps :: Sites & Blogger :: Overview

In addition to the core email, calendaring and document management functions, [Google Apps](#) [1] offers these additional applications to HSU students, staff, faculty, and alumni. Click the appropriate link below to learn more.

[2][Google Sites](#) [3] - This application lets you create small websites quickly and easily. You can customize the look and feel with dozens of pre-built templates and settings for accessing and sharing information. If you've used WYSIWYG page authoring tools like [Dreamweaver](#) [4], you'll find Google Sites intuitive to use.

[5][Blogger](#) [6] - Set up and publish personal blogs without needing to learn HTML with Google's intuitive Blogger application. You can choose from a variety of page templates, customize the page design to reflect your goals and personality, and automatically timestamp every entry for ease of tracking and archiving.

Google's continuously rolling out new services and improvements - [keep tabs on these changes](#). [7]
