

## Student Data

Student Data (CS) - Campus Solutions comprises four Data Marts, each of which covers multiple subject areas and contains a number of dashboards, or views into the data.

- **Admissions and Recruiting:** This data mart contains application, admission, and enrollment data for students, as well as a summary of academic information prior to application to HSU. Plans are also under way to incorporate Hobson's prospect data into this mart to complete the prospect-to-applicant-to-enrollee funnel.
- **Student Records:** This data mart contains academic plan and program information, class and term enrollment detail and summaries, and information on class meeting patterns, instructors and degrees.
- **Student Financial Services:** This data mart contains information on student awards, billing and credit records, and transaction and payment details.
- **Institutional Research:** This data mart contains "snapshot" (point in time) information related to admissions, enrollment, and graduation data for the purpose of analysis and forecasting.

### Access

If you currently have access to [OBI](#) [1], go ahead and log in [here](#) [2].

If you do not yet have access to the reports you need, you'll need to complete an [Access Request Form](#) [3] and have your manager forward the form to [arf@help.humboldt.edu](mailto:arf@help.humboldt.edu) [4].

Once access has been authorized and you've taken the required online training courses, you can log into OBI with your [HSU User Name](#) [5] and Password.
