

How do I uninstall the Safe Connect PolicyKey?

If, for any reason, you need to uninstall the [PolicyKey](#) software, follow the instructions below. Remember that once you do this, you will not be able to access the HSU network until you reinstall the software and re-authenticate your system.

If you have a PC:

1. Open the Control Panel
2. Select Programs and Features
3. Scroll down the list of programs until you see SafeConnect.exe
4. Select SafeConnect.Exe and click Uninstall

If you have a Mac:

1. Open the Applications folder and locate SafeConnect.app (you may see just SafeConnect listed)
2. Right-click or Control-click on SafeConnect or SafeConnect.app and select Show Package Contents
3. Open the Contents folder and you'll see the file SCUinstall.app
4. Double-click on SCUinstall to run the uninstall routine.
