

How to organize a conference on campus. Can I pre-arrange wireless access for attendees and volunteers?

To use the [HSUGuest wireless](#) network, conference attendees and non-HSU affiliated volunteers should use the self-registration process; a cellphone is required for transmission of user credentials. The default validity period for self-registered users is 15 days; this can be extended by applying to the Technology Help Desk in person in Library 120. Note that the HSUGuest network does not support the use of wireless printing on campus.

For other aspects of HSU IT resource usage, please complete the [online account request form](#), selecting the Group/Conference/Event login option.
