

Why doesn't my old Moodle bookmark take me to myHumboldt?

You need to update your old [Moodle](#) bookmark now that it's been integrated into myHumboldt, so that the bookmark takes you to <http://humboldt.edu/myhumboldt>. If you don't, you're not only missing out on news and updates posted to myHumboldt - you're also using those applications less securely. And if you come across links on other websites that you think should point to myHumboldt, please let us know via the feedback [tab](#) on the right side of this screen.
