

Another Phishing Attempt

Last Updated: May 13, 2013 - 12:37pm

System: Other

Issue start: May 13 2013 - 13:32

Estimated resolution time: May 13 2013 - 14:32

Who is affected: Campus Users

Affected in what way: Another phishing attempt has made its way onto campus. This one has a subject of "Dear Humboldt Webmail Account Subscriber" and a body which begins "This is to inform you that due to recent spam complaints in our web database system, our investigation shows that our webmail.humboldt.edu account is compromised and frequently send out spam messages" (which is kinda funny).

What happened: Please ignore and delete. If any of your users fell for it, just have them reset their password. The Help Desk (x4357) can assist with this.
