

Nolij

Last Updated: June 15, 2013 - 12:04pm

System: Other

Status: Maintenance Window

Issue start: Jun 15 2013 - 13:00

Estimated resolution time: Jun 15 2013 - 17:00

Who is affected: All Nolij Users / OAK database server users

Affected in what way: The OAK database server is taking longer than expected to commit SWAP. It will be rebooted before 5 p.m., which will bring Nolij services back online.

Workaround: None

What happened: Shutdown delays due to excessive Database server Memory Use.
