

My parents are coming to visit me on campus. Will they be able to get online while they're here?

Yes. The HSUGuest wireless network has been specifically designed for use by short-term campus visitors. When your parents arrive, their device(s) will detect a network called HSUGuest. When they select this network, a short registration form will appear. All they need to do is complete this form and a dedicated user name and password will be sent to their cellphone (must be a US or Canadian 10-digit number). It takes just seconds and is valid for a maximum period of 15 days. If, for any reason, they need to extend this time, they can just stop by the Technology Help Desk in Library 120 to get this done.
