

## My cellphone died - how can I get my HSUGuest user name and password?

Our automated registration system is set up to primarily use the cellular network to deliver your login credentials, but we do also send the information to the email address you used to register. So if you can access your email on another device, you will be able to retrieve your credentials. If that's not possible, the Technology Help Desk can look the information up for you, but you'll need to go to Library 120 in person to request this.
