

Pay-for-Print :: Installing Windows Printers

To install printers on your Windows laptop, follow these instructions:

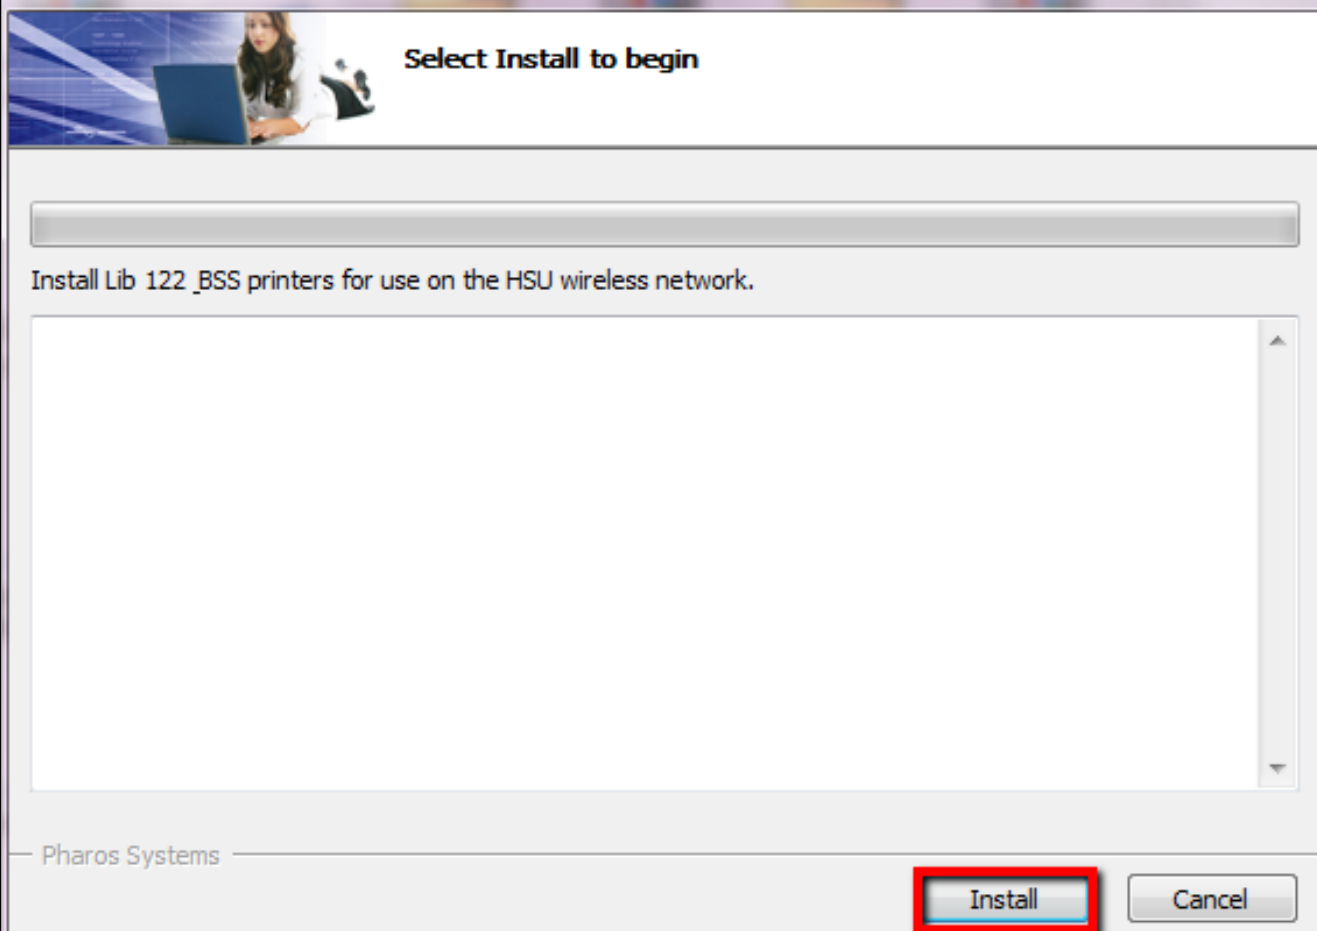

Step 1: Download the [printer installer tool](#) [1]. Save the file when prompted. Take note of where you've saved it (typically your Desktop or Downloads folder)

Step 2: Locate the file (WirelessPrinters_for_Lte.exe) that you just downloaded (typically it will be on your Desktop or in your Downloads folder). **Double-click** on the installer to run it.

Step 3: Click the Install button (in the lower right-hand corner) to begin the install process. (It may take several minutes for the installation to complete).

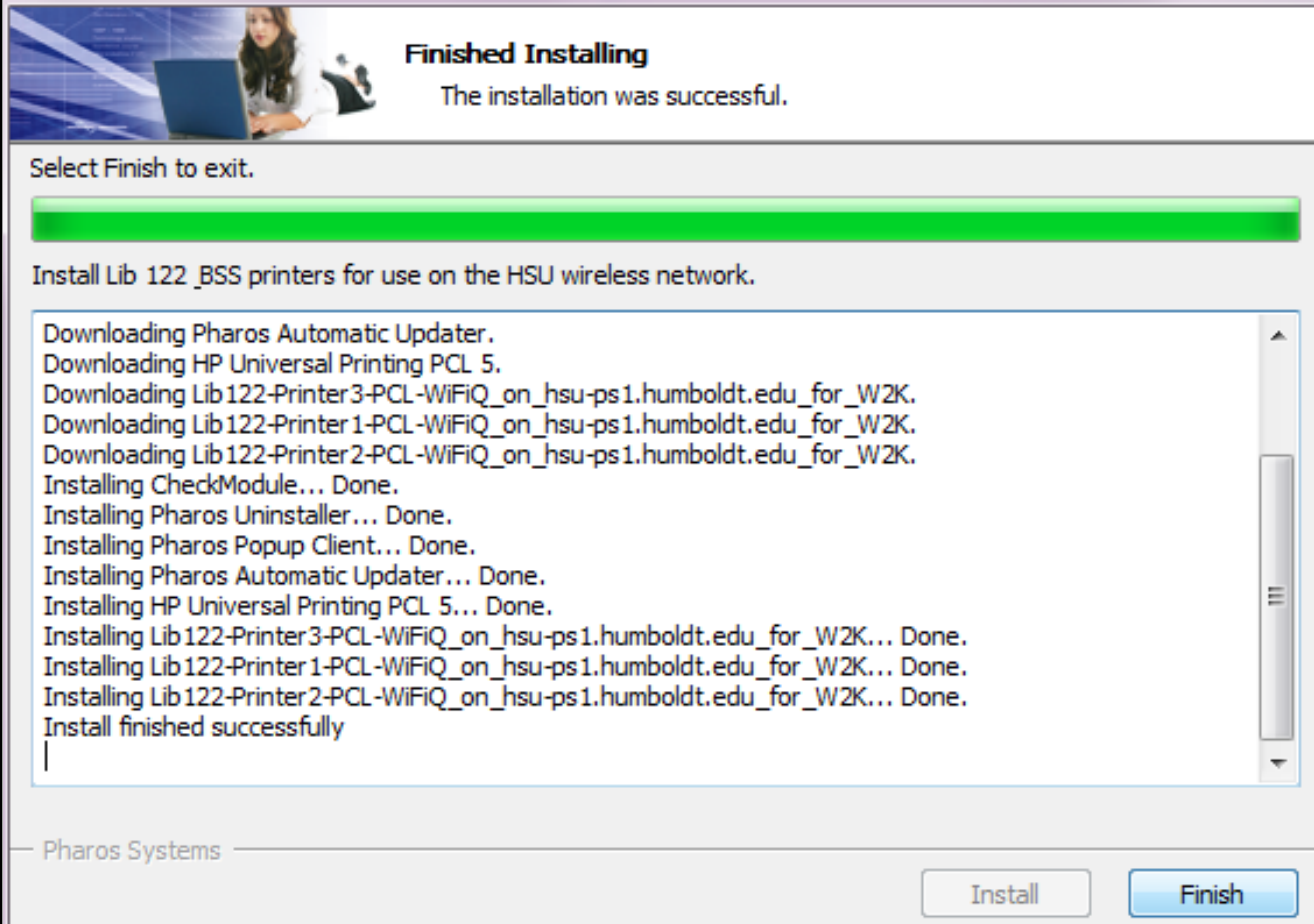

Note: There is a small chance your antivirus software may quarantine one of the files during the installation process. This file really is safe and is NOT a virus, so don't worry if you see a message that the file was quarantined.

Package "Wireless Printers" installer.

Step 4: When the installer has finished, **click the Finish button.**

Package "Wireless Printers" installer.

You should now have the following printers available to you:

1. FH143-Printer1-WiFi
2. BSS316-Printer1-WiFi
3. BSS316-Printer2-WiFi
4. LIB101-Printer1-WiFi
5. LIB101-Printer2-WiFi
6. LIB101-Color-Printer3-wifi

To print to one of these printers, follow these [printing instructions](#) [2].
