

## ITS Project Office

The ITS Project Office works with project sponsors and stakeholders across campus in support of Humboldt State University's information technology goals and priorities:

### [Project Management](#) [1]:

We work with technology project sponsors to define, implement, and deliver IT services and solutions across campus

### [Process Improvement](#) [2]:

We work with stakeholders across campus to improve underlying processes to ensure maximum benefit is derived from IT projects

### [Common Management System \(CMS\)](#) [3]:

We coordinate CMS operations to ensure Peoplesoft access, maintenance, and updates are handled efficiently

See how we bring project management and process improvement together in [our portfolio of projects and process improvement initiatives](#). [4]

We also:

- maintain the ITS website and ensure that all IT-related content is kept up-to-date and relevant to the entire HSU community
- keep the campus informed about technology projects using a wide range of communications channels
