Odds & Ends of Introductory Statistics

Yoon G. Kim
Professor of Mathematics, Humboldt State University

Thursday, February 12, 2015
Behavioral and Social Sciences Building Room 166, 4 p.m.

There are many misconceptions and misunderstandings about commonly used items in statistics. This talk is based on personal notes from what I have encountered over the years when dealing with students and consulting clients. Issues include p-value, t-test, residuals, interaction, link function, etc.

For a complete abstract, go to http://www.humboldt.edu/math/news-and-events/math-colloquium

We invite you to the Pre-colloquium Tea on the third floor of the BSS building at 3:30 on Thursday.
