PROJECT INFORMATION

Title	Interactive Audit		
Level	Campus Wide	Type	Upgrade
Purpose	<p>The problem of Faculty advisors and students have indicated a dissatisfaction with our current DARS print out. The current format, we are told, is difficult to read and how to comprehend. An upgrade to our existing DARS system to u.achieve will allow the university to also implement an interactive audit - an add on to u.achieve. The interactive audit builds in a graphical representation of the students degree completion status. It provides not only the student, but the faculty advisor a visual guide on the progress to degree completion. The available charts permit the student to drill down to see missing/complete subject requirements and run what if scenarios if the student is contemplating a different major. The overall goal of this project is to better facilitate progress to graduation in a timely manner.</p> <p>affects Students, faculty advisors, and our overall graduation rate.</p> <p>the impact of which is longer time spent at the university to graduate, poor retention, students taking unnecessary classes, faculty and students unable to read the DARS report.</p> <p>a successful solution would be Implementing the interactive audit to provide clarity to a student's current standing in completing a degree at Humboldt State</p>		
Alternatives	Keeping only the PDF version of the DARS report and/or further implementing the OBI project proposed by Professional Studies		
Alignment with HSU Annual Priorities	Enrollment Management - degree completion, time to degree, retention Communication - easier to understand degree report		

ITS Project Request

Deadline	12/1/12	No Hard Deadline	
Deadline Reason	Based on conversations with Deans Council and Provost, our goal is to have the interactive audit available Spring 2013		
Considerations / Dependencies	The u.achieve upgrade to DARS would need to be implemented prior to working on the interactive audit.		
Resources	Office of the Registrar and ITS		
Estimated Cost (Hard costs only)	Initial	Annual	Budgeted
Affected System(s) / Module(s)	PeopleSoft and DARS		
Other

Subject: Statement of Support for Registrar's Office

The Registrar's Office is submitting several project proposals. Each one is to support various members of the campus community. Two project proposals build off the other by first upgrading our existing degree audit report and the second by enhancing it with an interactive audit. Additional proposals support faculty in their work within PeopleSoft. We have allocated the necessary resources in the office to implement these projects with the support of ITS.
